

Through thick and thin

We can turn out pure aluminum foils as thin as 10 micron (0.010 mm) up to 300 micron (0.300 mm) and can deliver on rolls, ready for use. In addition to the standard produce program, custom slitting widths of from 20 mm up to 1250 mm are possible – even in small quantities!

Standard aluminium program, smooth, soft – also in hard quality available

| Thickness (µm) | Width (mm) | Length (m) | Contents (m ²) |
|----------------|------------|------------|----------------------------|
| 10 | 1.000 | 250 | 250 |
| 15 | 1.200 | 150 | 180 |
